

DONATO

donate crypto in one click without commission

What problem is being solved?

Our project solves such problems as: charity in cryptocurrency, donation without commission, speed and simplicity of donation.

Why does this problem need to be solved?

1. The most valuable resource of a person is his time, therefore, fundraising services should do everything so that a person can donate money as quickly as possible. The less time people spend on it, the more they will do it.
2. Since the Binance exchange is the most popular and a huge number of people use it, we thought it was stupid to spend money on commissions when conducting transactions within one exchange.

Who is affected by this problem and why would they use your solution?

This problem primarily affects volunteers who often conduct fundraising, as well as people who are ready to donate money for various needs.

They should use our product as it simplifies and speeds up fundraising, increase in the total amount of the fee from the commission and also allows you to donate money without withdrawing it from the crypto.

What is the functionality of your solution?

In our service, it is possible to quickly send funds via a qr code or a link, in the future we plan to add options for sending via other wallets (such as Metamask, Trust Wallet etc.) and networks.

What is your plan for real world implementation

Our plan can be implemented soon if all the leading funds pay attention to various options for optimizing donations, one of which is the Binance Pay we offer.
